25 year Guarantee

FREE CAD drawings + calc pack  
FREE delivery in 3-4 weeks  
FREE self assembly manual  
(erection service available)

How the process works :-

1. Fill out our online quotation form with your requirements, building use, plan dimensions, height, type of roof, insulation requirements, number & position of doors and windows, exterior finish.
2. We will supply you with a FREE quote and basic layout plan by email.
3. Once you are happy with design you simply pay a deposit and we then arrange a delivery date to suit, normally 3-4 weeks.
4. Building is then manufactured to order at the factory and transported to site, 10 days after balance paid.

Note :

We offer the Customer the opportunity of using our Bonded Order system. For a small fee the customer's funds for their building are held securely by the Nat West Bank until it arrives on site.

As all our buildings comply with the relevant building codes & meet building control requirements, this means you can be assured that your new steel building will be designed correctly to withstand the harshest elements & environment it will be placed in, at a very competitive price.

Together with our sister Architect website we can obtain Planning & Building Warrants in-house, we do not sub-contract, reducing costs for commission etc.

We can provide a full turnkey service if required to include Planning & Warrant applications complete with civil, groundworks, concrete base, foundation & Structural Design
